Website Protection For Wing Hang Bank Merchants

Austreme's Website Protection Security-as-a-Service (SaaS) is an ongoing risk lifecycle management program for Internet websites and web applications.

This service is delivered via Austreme secure clouds powered by Seccom Global – market leader as rated by Gartner's 2009 and 2010 Asia Pacific Managed Security Service Provider Market Scope Report. The cloud architecture has full redundancy security operations centers (SOCs) with "people, process & procedure and technologies" to help enforcing **Prevent** → **Protect** → **Respond** risk lifecycle management.

Key benefits:

- ❖ Simple yet effective risk reduction for Internet websites and applications
- ❖ Practical proactive and preventive solution
- ❖ Long term affordability
- ❖ No hardware or software to install
